CONTACT

Introducing **ME**

I'm Neo Matsio (Neo The Kreator), a Johannesburg based digital designer and web developer.

With a passion for graphic design principles such as white space, balance, alignment and contrast. I believe that every design project I work on should be functional and suit the needs each client has. To achieve this I have armed myself with strong technical skills and proficiency in Adobe software such as illustrator, indesign and photoshop.

In my web development journey I've been able to continuously learn more as technology evolves and newer languages, libraries and frameworks are rolled out. Web development challenges me to keep learning and strive to bettering myself and skillset and as challenging as it gets I've learned to keep researching for solutions.

Combing my skills in graphic design, knowledge of the basics of UI design and web development, has helped me be a better digital designer and web developer overall.

Please enjoy

Neo Matsio
Graphic Designer

VISION

I strive to create brand designs that communicate their stories through multiple digital platforms by never stopping to learn and listen.

OBJECTIVE

To keep learning and improving my skills. And working with more creative individuals and companies.

"You Can't Use Up Creativity, the More You Use the More You Have"

MAYA ANGELOU

SKILLS

It has been a fun journey of learning and everyday I grow more and learn even more.
